

# Teenagers 2.0: Teaching Digital Citizenship

## Teaching Wisdom in a Digital World

The digital revolution has changed the way we communicate and relate. The rate of technological advancement has outpaced the development of clear behavioural models and norms for online conduct. This 2 & 1/2 hour seminar explores concepts of digital citizenship and seeks to provide a constructive framework for engaging with teenagers about digital media usage.

- Explore **WHAT** opportunities and threats are present for teenagers in their use of technology in everyday life.

- Learn **HOW** to equip students to be responsible digital citizens. Find out what you can do to help teenagers participate constructively and safely online.

- Discover **WHO** the Digital Natives are and explore the myths and realities that surround the most technologically stimulated generation in history.

Gain a thorough understanding of the impact of digital media on students and the essence of digital citizenship:

- How technology has shaped this generation and how they view the world
- The risks of technology; the facts and the myths
- The parallel paradigms of fear and engagement surrounding emerging technology
- The attitudes of teenagers towards relating via digital media
- Common behaviours and trends of teenage technology use
- What is digital citizenship
- Why digital citizenship matters
- Who are Digital Natives and what does this mean for education
- Possible futures for digital media in education
- Policy and strategic considerations for schools

Explore how to incorporate teaching digital citizenship into the school program:

- Explore the differences between “teaching about” and “teaching with” technology
- Ideas for integrating the use of digital technology in class
- How to teach Digital Citizenship
- Modeling responsible online behaviour
- Demonstrating the connection between online actions and real life consequences
- Moving from fear to wisdom based approaches to teaching about online risks
- Explore the realities and myths of Digital Natives use of technology
- Discover common assumptions educators make about student’s digital capabilities
- Incorporating issues of digital conduct into discipline and welfare strategies

### INTERACTIVE LEARNING

Catering for all learning styles, seminars provide high quality presentations with opportunities for discussion, creative exercises, and plenty of material to take away.

### LEARN FROM OTHERS

Understanding Teenagers seminars seek to create dialogue between participants to capture the wealth of professional knowledge gathered.

### QUALITY INFORMATION

Our material is based on current theory and research, and tailored to the needs of working with teenagers in the 21st century.

### COST

Self hosted - \$600 / group

Individual prices from \$65/person
